

**PACKAGED EVAPORATING AND CONDENSING UNIT**

**COMPONENTS:**

- |    |                              |    |                            |
|----|------------------------------|----|----------------------------|
| 1  | Compressor                   | 12 | Liquid line solenoid valve |
| 2  | High pressure switch         | 13 | Fan Control Pressure tap   |
| 3  | Low pressure switch          |    |                            |
| 4  | Evaporator                   |    |                            |
| 5  | Refrigerator distributor     |    |                            |
| 6  | Thermostatic expansion valve |    |                            |
| 7  | Liquid line solenoid valve   |    |                            |
| 8  | Sight glass                  |    |                            |
| 9  | Filter-drier                 |    |                            |
| 10 | Access valve                 |    |                            |
| 11 | Condenser                    |    |                            |
